Profile

Aspiring Full-Stack MEAN Stack Developer with hands-on experience building scalable web applications using Angular, Node.js, Express.js, and MongoDB. Skilled in developing responsive user interfaces, secure authentication systems, RESTful APIs, and full-stack application architecture. Passionate about problem-solving, clean code practices, and continuously learning modern technologies through real-world projects.

Skills

Languages
C/C++, C#, Python, JavaScript, TypeScript

Technologies and Tools
Django, Angular, Node.js, Express.js, Socket.IO, HTML, CSS, Bootstrap, Git, GitHub, Linux, Bash, Vim, MVC Architecture, REST APIs, JWT Authentication

Interpersonal Skills
Problem Solving, Critical Thinking, Teamwork, Fast Learning

Database Systems
SQL: SQLite, MySQL, PostgreSQL
NoSQL: MongoDB, Mongoose

Object-Oriented Programming
Solid knowledge of OOP concepts and SOLID principles

Data Structures and Algorithms
Solid understanding of many data structures and algorithms

Experience

MEAN Stack Trainee
National Telecommunication Institute (NTI)
Mar 1 – May 24, 2026 – On-site

- Intensive training program at the National Telecommunication Institute (NTI) focusing on the MEAN Stack (MongoDB, Express.js, Angular, and Node.js). Building full-stack web applications and enhancing backend development skills.

Web Design Trainee
National Telecommunication Institute (NTI)
Jul 20 – Aug 14, 2025 – Remote

- Participated in an intensive training program focused on front-end web development, including HTML5, CSS3, JavaScript, Bootstrap, and gained a basic understanding of APIs and AJAX. Gained practical experience by working on real-world projects and building fully responsive websites. Improved coding skills through hands-on exercises and guided project work.

Education

Bachelor of Computer Science
Faculty of Computers and Informatics
Zagazig University — Egypt
Expected Graduation: June, 2027
GPA: 3.18 (Very Good)

Courses

CS50, Web Programming using Python and Javascript
Harvard University, EDX

CS50, Introduction to Computer Science
Harvard University, EDX

Projects

Chatify – Real-Time Chat Application
Links: Live Demo | GitHub
Tech Stack: *Angular, TypeScript, Node.js, Express.js, MongoDB, Socket.IO, JWT*
Developed a real-time chat application that enables users to exchange messages instantly, track online/offline presence, view typing indicators, and maintain persistent chat history through secure authentication and real-time communication.

CommerceX – Full Stack E-Commerce Platform
Links: Live Demo | GitHub
Tech Stack: *Angular, TypeScript, Node.js, Express.js, MongoDB, JWT, Stripe, REST APIs*
Developed a full-stack e-commerce web application with secure JWT authentication, OTP email verification, Password recovery, Stripe payment integration, cart and order management, responsive UI, protected routes, and a role-based admin dashboard for managing products and store operations.

To-Do List Web Application
Links: GitHub
Tech Stack: *Django, HTML and CSS*
Built a basic to-do list app using Django and HTML/CSS, implementing url routing, views, and templates. Supported task add/view/delete with session-based temporary storage

WebVerse
Links: Live Demo | GitHub
Tech Stack: *HTML, CSS, JavaScript and Bootstrap*
A business website developed using HTML, CSS, Bootstrap, and JavaScript. Includes a collapse component and a clean, modern design.

Certificates

- CS50: Introduction to Computer Science – Harvard (edX)
- Foundational C# with Microsoft – freeCodeCamp & Microsoft Learn
- Mastering SOLID Principles - Udemy
- SQL (Intermediate) - HackerRank
- Web Designer Track – National Telecommunication Institute (NTI) (Aug 2025)
- SQL (Basic) – HackerRank
- CS50's Introduction to Databases with SQL - Harvard (edX)
